

The Hatch Net 120S

FALL THROUGH PREVENTION SYSTEM

ARE YOU DOING ALL YOU CAN TO PREVENT FALL THROUGH?

REDUCE RISK:

The Hatch Net 120S* System can help you drastically reduce the risk of death or injuries from a fall through in almost any hatch installation. It meets or exceeds all current OSHA and ANSI regulations, affording valuable protection from costly lawsuits, lost time accidents, and OSHA citations and fines. With a safer workplace and fewer accidents, it can also lower worker's compensation and liability costs.

LOWER COST:

The Hatch Net 120S* design allows for 85% or more of normal day to day procedures to be performed without opening the net. This means one person can safely perform most inspections and routine maintenance without the need for an additional worker, freeing up an extra man to perform other duties.

INCREASE PRODUCTIVITY:

The Hatch Net 120S's unique, lightweight net system does not restrict light or visibility needed for inspections, and with the durable all stainless steel design, it will easily slide open for years to come. The Hatch Net is easily installed in virtually any floor opening, eliminating the need for expensive and cumbersome personal protective equipment or guard rails.

Finding new and innovative ways to help everyone work safer

The Hatch Net 120S

FALL THROUGH PREVENTION SYSTEM

FEATURES

- Durable stainless steel construction with a highly visible synthetic netting.
- Sewn with Teflon thread, not affected by UV radiation, acid rain, industrial pollutants or cleaning agents.
- All systems are shipped completely assembled including attaching hardware.
- Easily installed in virtually any floor or roof opening, new or existing application in minutes.
- Retracts easily for access to confined space.
- Greatly improves employee safety while allowing freedom of movement and full visibility of area below net.
- Meets or exceeds all current OSHA and ANSI standards.
- Many sizes in stock, custom sizes are manufactured in days at no additional cost.
- Full five (5) year warranty on materials and workmanship.

ORDERING

All units are shipped completely assembled and ready for installation by an independent contractor, or can be easily installed per manufacturers instructions. All usual and customary hatch sizes are available, special sizes upon request. Please call with floor opening dimensions and quantities.

SPECIFICATIONS

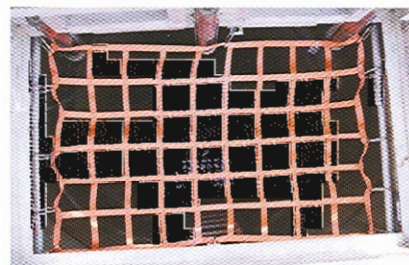

All access openings shall be fitted with a permanently installed, rail mounted, retractable fall prevention system that facilitates access to the confined space. This system shall be a Hatch Net 120S as manufactured by Safe Approach Inc., Auburn ME (800) 471-1157 or equal.

The system must conform to the following specification:

ANSI A 10.11
OSHA 1926.502
OSHA 1926.105
OSHA 1910.144
OSHA 1910.145

ASTM B 117-97
ASTM D 2454-95
ASTM D 2794-93
ASTM D 3359-97
ASTM E 74
ASTM G 53-88

All hardware components of the provided fall through prevention system must be stainless steel.

Proudly made in the U.S.A.
