

Standing Seam Roof Clamp (Small) Part# 00086-2

SPECIFICATIONS
PAGE 1 OF 1

DESCRIPTION

The standing seam roof clamp is a roof mounted fall protection system designed for use on sloped or flat roofs. It allows workers free movement while tied off to a retracting lifeline device. The system comes with a telescoping clamp which fastens to most standing seam structures. Special conditions may require a different system. Fits seam sizes 10" - 16" & 19" - 32".

GENERAL SPECIFICATIONS
