

# 10' Pole End Brace Assembly Part# P-00700-PB

SPECIFICATIONS  
PAGE 1 OF 1

### DESCRIPTION

The 10' pole end brace assembly is required between the last two poles of a system for any system that must be "dead-ended" and cannot be tied back beyond the last pole. When using the pole brace, the next pole from the end should be tied back.

### INSTRUCTIONS

1. Attach the pole end brace to the two last poles by connecting the brace's eye bolts to the pole eye bolts using a shackle.
2. Use the inner pole that the brace is attached to for securing the tie-back cable.

**WARNING:** Failure to securely tie back the inner pole and secure the bracing between the end poles could cause the system to fail if a significant load were to impact the 10' net section at the end.

### GENERAL SPECIFICATIONS

Item	Description
Pole	6061-T6 Extruded Structural Aluminum Pipe, Mill Finish
Eye Bolt	3/4" Forged, Galvanized

#### Technical References:

- (1) Meets OSHA 1926 Subpart M for fall arrest netting when used as part of a complete system.
- (2) Meets ANSI A 10.11 drop test requirements for fall arrest netting when used as part of a complete system.
- (3) Break Strength—N/A
